

Fish committee meeting minutes
Bristol Town Hall
May 9 2019

Present:

Rick Poland
Jay Crooker
Brent Fogg
Tyler Cheney
Nate Simmons
Alison Hanley Lee
Lyn Prentice
Stu Mahan

The run starts around Mother's Day and end around Father's Day. The leader fence and ladder will need daily maintenance for the next month.

Meeting Sunday the 12th at noon to move sandbags. Group will also work a daily schedule for leader maintenance

Water temperature down at the landing this week was about 53 degrees.

River cleared out from partridge bridge to the Dam.

Brent and Tyler are going to start clearing debris from south of the Dam.

Mike Brown DMR sent Jay the final reports from 2013-2017. He also sent Jay, Visucount software. It keeps track of the count data

Water level needs to be between 7"-9" in the ladder for best flow.

Bottom of the ladder (entry pool) needs to be adjusted as water level drops

Questions for Mike Brown:

How many years of data do we need on the Pemaquid River before we can start harvesting? Also, what does the count need to be?

Alison and Rick are checking with some local groups about 501c3.

Ask Marvin Farrin and Zach Stolz if they can help with the leader fence.

Next meeting June 13th Thursday 6pm.

Questions for further discussion:

What are the stakes for and who put them there.

Donation box at the Dam?

Woolwich and Damariscotta are they seeing any fish yet?

Rocks from the bridge behind the town office can we have them?

Meeting adjourned 7:25pm

Respectfully submitted,
Alison Hanley Lee
